SUMMARY

AI Engineer focused on building practical AI systems that improve operational efficiency and decision making, with measurable business impact.

SKILLS

- Python, SQL
- Machine Learning (NLP, Computer Vision)
- Autonomous Agents, RAG
- Model Deployment (APIs, Cloud)
- Git, Jupyter

EXPERIENCE

I-Tek Global (On-Site)

Agentic AI Engineer | July 2025 – Present

- Led development of autonomous agents to streamline restaurant operations.
- Built daily operations monitoring system contributing to 10%+ profit increase.
- Reduced inventory wastage from 15% to 3% through sales and stock analysis.
- Prevented stock-outs and minimized rush orders, improving revenue stability.

UCapacity Pvt. Ltd. — Islamabad, Pakistan

Junior AI Developer | Nov 2024 – Feb 2025

- Built and shipped AI features used in production, improving user experience and reducing manual effort.
- Took models from data preparation to deployment, improving reliability and iteration speed.

UCapacity Pvt. Ltd. — Islamabad, Pakistan

AI Developer Intern | Aug 2024 – Oct 2024

- Developed predictive models for real estate use-cases and improved baselines through iteration.
- Collected, cleaned, and prepared datasets, and evaluated models using standard ML metrics.

EDUCATION

Bachelor of Science in Artificial Intelligence — Bahria University, Islamabad (Completed 2026)

PROJECTS

- Banking Support Assistant — Automated handling of common banking customer queries to improve response efficiency.
- Fraud Monitoring System — Real-time transaction monitoring with instant user confirmation for suspicious activity.
- Financial Advisory Assistant — Guided customers on financial instruments and connected them with professionals when required.
- Competitor Analysis Agent — Automated competitor analysis using structured agent workflows.
